

LearnKey's CompTIA Courseware

With over 30 years of experience, LearnKey offers engaging, interactive, and flexible training mapped to industry certifications available online through GMetrix.

- Full-motion digital video available anytime, anywhere with an Internet connection
- The GMetrix platform provides the ultimate certification training solution with a single sign-on between training and test prep
- Project-based learning lessons and workbooks with hands-on activities help reinforce what the students are learning
- Teacher workbooks with answer keys and lesson plans

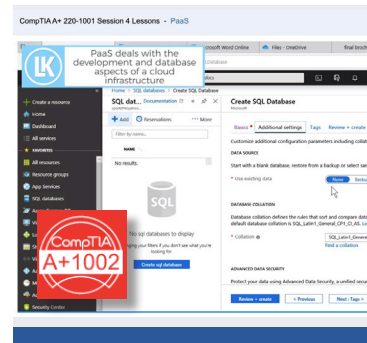

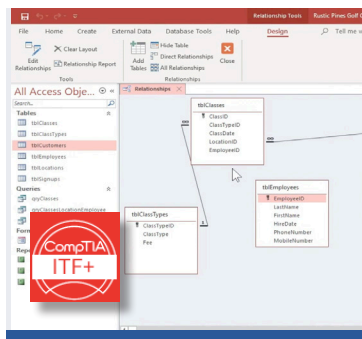

COURSE OFFERINGS

CompTIA A+ 1001

The first half of the A+ series takes you, a virtual new hire at a computer repair shop, through the hardware-related portions of the A+ certification series. Specific topics covered include: mobile devices, networking, hardware, virtualization and cloud computing, and hardware and network troubleshooting. The course also will help improve your employability prospects in the IT technician field, as this course has several hours of video, practice labs and tests for each domain, and a project workbook full of hands-on projects to help you prepare for the 220-1001 exam. This is the first of two exams needed to gain an A+ certification.

COMBINED A+ 1001/1002 CLASS HOURS: 150

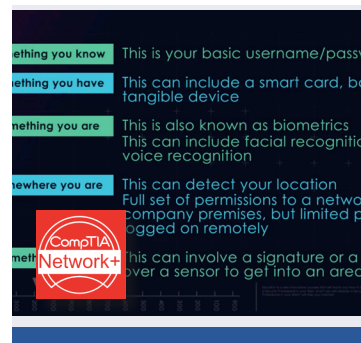

CompTIA A+ 1002

The second half of the A+ series continues your journey as a virtual new hire at a computer repair shop, to where you will learn about the software-related aspects of being an IT technician, with heavy focus on operating systems, security, software troubleshooting, and operational procedures. Being employable means being able to support hardware and software issues, and this entire series, with the videos, practice labs, practice tests, and project workbook, will help you become more employable and for this course, help you prepare for the 220-1002 exam, the second of two exams needed to gain an A+ certification.

IT Fundamentals

This course will focus on essential IT skills and foundational knowledge for an entry level IT professional. Specific topics covered include: concepts and terminology, infrastructure, applications and software, software development, security and database fundamentals. Among these topics, students will learn how to identify types of software, how to use an operating system, understand common peripherals, and learn key troubleshooting methodologies. At the completion of this course students will be prepared to take the IT Fundamentals exam and will be more employable for any entry level IT position.

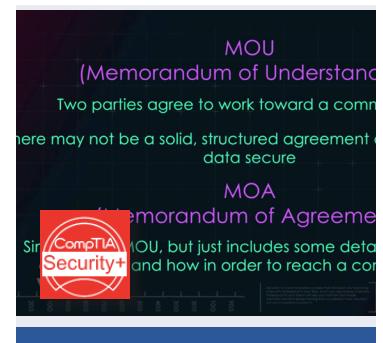

CLASS HOURS: 36 HRS.

CompTIA Network+

The Network+ (N10-007) course is an excellent course for those looking to gain employability skills in the area of network administration and gain the CompTIA Network+ certification. Specifically, this course covers the five domains on the N10-007 exam: networking concepts, infrastructure, networking operations, network security, and network troubleshooting. This course covers the material through the eyes of a brand-new junior network administrator, learning both what it takes to pass the exam and the real-life job skills necessary to succeed as a junior to mid-level network administrator.

CLASS HOURS: 60 HRS.

CompTIA Security+

This CompTIA certification course helps to prepare students to take and pass the SY0-501 Security+ exam and obtain the Security+ certification. This course is excellent for those looking to increase their employability prospects in security administration careers. Specific topics covered in this course include: security threats, attacks and vulnerabilities, tools and technologies, architecture and design, identity and access methods, risk management, and cryptography.

CLASS HOURS: 24 HRS.

Each Course Includes:

Video-based instruction, exercise labs, pre and posttests, flash cards in addition to a PDF project workbook. The workbook includes fill-in-the-blanks, glossary terms and definitions, and many other resources to help reinforce learning.
